About VELORBIS

OUR PHILOSOPHY

We want to inspire people to incorporate cycling as part of a sustainable, healthy lifestyle. The uniquely integrated Danish cycling culture, where people see cycling as a fashionable, practical and convenient means of transportation, is the foundation for our mission. At VELORBIS® we focus on designing and fusing stylish and high quality classic bicycles with practical contemporary components, to support the urban lifestyle of modern commuters. Passion for excellence is what drives us and this is reflected in everything we do. Our vision is to contribute to a greener and healthier environment for all of us, by making the classic style of bicycle the preferred choice of transportation for style-conscious urban commuters. It's time for a change.

FLAWLESS DESIGN

Denmark is renowned for great design with superior attention to detail, particularly when it comes to product design and quality. We are proud to say that our entire range of traditional upright style bicycles are designed by our creative design team in Copenhagen, Denmark, recognised as the cycling capital of the world with a unique cycle heritage. At VELORBIS® we value simplicity combined with streamlined, elegant design. You will find neither stickers nor plastic components on a VELORBIS® bicycle – only the distinctive, embossed lion crest crafted from chromed aluminium reveals that you are the proud owner of a VELORBIS® bicycle. We are true to our values when we say, "It's amazing, it's fantastic - not a single piece of plastic."

FOCUS ON QUALITY

Our German production site, and a flexible and market-leading supplier base, enables us to offer 'best in class' bicycles that are nothing less than the highest quality on the market today. We use premium components sourced in Europe such as BROOKS, Sturmey Archer, Schwalbe, Van Shorthorst, and Bush & Müller. All of our low-maintenance, upright bicycles are specially built to resist the tough Scandinavian weather where snow, frost and salt constantly threaten to attack every component of the bicycle. Manufacturing our traditionally lugged and brazed handmade frames at our German factory, enables us to reduce lead times and gives us added flexibility to constantly monitor and optimise our quality control process.

Company Bicycles

BUSINESS SOLUTIONS

Professional corporations, organisations and councils today want to create a stress-free travel environment for their employees and encourage a healthy lifestyle through cycling initiatives that go hand-in-hand with their values and green travel plans and policies. As we all know; a healthy body equals a healthy, motivated mind.

An available bicycle fleet can be viewed as a good-will gesture with the cost often fully tax deductible for corporations, organisations and councils. VELORBIS® can help fulfil this goal. We can customise company bicycles with corporate colours, logos and slogans or brand messages so that the bicycles act as mobile business cards. This is a very cost effective and carbon friendly mobile marketing tool.

SCRAP DELUXE LADIES

Scrap Deluxe Ladies

Stop the traffic in style with this urban icon – cool design and raw distressed finish meets luxury leather accessories and blonde highlights in a medley of cycling style.

LONG JOHN

Long John

The VELORBIS Long John bicycle is a transport bike with an extraordinary long-wheel base that can carry a huge load, but can still squeeze through traffic with ease. In order to carry considerably more loads on a 2-wheeler bicycle, the design and ergonomics require a long-wheel base structure where the front wheel is steered via a linkage.
